

# DRYSPEC® KILN CONTROL SYSTEMS

Take Control with DrySpec®

## Transform Your Operations with Our Advanced Control Systems

### Quality Components:

- **Customized Controls:** Tailored programming to meet your site's specific needs, integrating alarms, layouts, and site-specific equipment.
- **Industry Standard Components:** Featuring Allen-Bradley components and Logix 5000 software, ensuring top-quality and availability.
- **Custom Reporting & SQL Data Exchange:** Expand your system's capabilities with advanced data management options.

### Training & Consulting:

- **Comprehensive On-site Training:** Includes operation basics, schedule creation, system safety, and maintenance planning.
- **Burner Tuning:** We optimize your fuel usage and increase your operational efficiency.
- **Efficient Commissioning:** Our engineers will ensure your system is optimized and fully operational, providing hands-on guidance and training.
- **Remote Support:** Count on our ongoing maintenance and six months of remote support services.
